Introductory

WE TAKE pleasure in presenting our Price List for Spring, 1920. Since issuing our Fall 1919 Price List there have been a number of advances in prices due to shortage; this is especially true in the fruit section, as the demand for all kinds of fruit trees and small plants is such that the nurseries are unable to supply the demand.

Owing to war conditions we could not grow as much stock as usual, and it will be a number of years before we can again grow enough stock to supply the demand.

On account of cheap prices for fruit only a few years ago, many orchardists neglected to care for their trees, with the result that millions of orchard trees have died for want of care—others have been allowed to become diseased, producing inferior fruit.

Those who took care of their trees have reaped enormous prices for their fruit. Our 53 years in the business convinces us that there will be a shortage of fruit for many years to come.

Better plant a good orchard this year, as we look for still higher prices on certain lines next year. Quotations are made subject to stock being unsold upon receipt of order.

Upon receipt of this Price List make up your order and send it in—we will tell you just what we can do should we be short of any varieties wanted.

Awaiting your favors, we are

Yours very truly,

TERMS OF SALE

Please Read Carefully

Terms Invariably Cash.

Remit by postoffice or express money order on St. Louis, Mo., registered mail to Nursery, Mo., or by draft. Do not send private checks unless drawn on some St. Louis Bank. Address all correspondence to H. J. Weber & Sons Nursery Company, Nursery, Mo.

C. O. D. Orders must be accompanied with at least 25 per cent of the amount in cash. If shipped by express, you pay the balance to your express agent upon delivery of goods. If by freight, you pay the balance at your bank, where you will find the bill of lading, which you present to the freight agent, who will deliver shipment to you. Always give us name of bank you wish us to send bill to. We deliver free of extra charge to any freight depot, express office, or boat landing in St. Louis, Mo.

Non-Warranty Clause.—If Nursery Stock proves untrue to the name under which it is sold by us, a replacement of the stock, as originally ordered, without charge, or a refund of the purchase price, shall be a complete satisfaction of our liability. Except for such liability, we give no undertaking or warranty, express or implied, as to description, quality, growth, productiveness, or any other matter of any Nursery Stock we sell.

We assume no liability for delays in delivery, or for non-delivery of Nursery Stock caused by frost, fire, flood, drought, hail, strikes, embargoes, war, or other causes beyond our control.

H. J. Weber & Sons Nursery Co.

Transportation Rules.—Every care is taken to secure safe and prompt transportation. The forwarders alone must be held responsible for loss or delay in transit.

Directions.—Observe carefully that your name, postoffice, county and state are plainly written on your order; also, state whether to be sent by freight or express, and by what route. If no directions be given, we will use our best judgment. Use order sheet enclosed.

Errors.—Any errors that may occur in filling orders must be reported within five days after receipt of goods. We will immediately correct same. Complaints entered after the above stated time will not be entertained.

Substitution.—It is customary, should the supply of a variety become exhausted (as will occasionally occur in all establishments), to substitute in its place a similar sort, if there is such. Should it be desired for us not to do this, please state on your order, "No Substitution."

Selections.—Persons not acquainted with the different varieties can leave the selection to us, in which case we will select as if planting for ourselves.

Inspection.—Our nurseries are annually inspected by the State Entomologist, and have been found free of San Jose Scale and other dangerous insects and diseases. A copy of certificate of inspection will be attached to every package that leaves our establishment.

Quotations.—Prices quoted in this catalogue are for the quantities specified. 1, 2 or 3 trees or plants of a kind are to be figured at the single price, 4 or more plants of a kind are to be figured at the 10 price, 40 trees of a kind at the 100 price. Example: 1 Oldenburg, 2 Wealthy, 3 Grimes, 2 Wine Sap, 2 York Imperial Apple are to be figured at the single price. If you take 4 trees of each variety mentioned above, you are entitled to the 10 price. If you take 40 Apple or more, not less than 5 trees of a variety, you will be entitled to the 100 price, and so on throughout the catalogue. Thousand prices will be quoted on application, where list of varieties accompanies the request. All orders are booked with the understanding that same shall be void should injury befall the stock from drouth, fire, hail, frost or other causes beyond our control.

Notice.—The prices in this list abrogate previous quotations and are made on stock to be strictly first-class in the grades named. Please do not compare our prices with firms quoting on mailing size trees and plants only.

DECIDUOUS ORNAMENTAL TREES

WE MAKE A SPECIALTY OF SUPPLYING

MEMORIAL TREES

LARGE SELECTION OF VARIETIES
AND SIZES.

Every City, County or District should plant a permanent tree in a Public Square, Park, Court House, School Ground, Cemetery or along a prominent highway, in memory and honor of every hero who gave his life in the World War.

Many Cities have already planted. Has your City or County done so?

For sizes larger or smaller than quoted herein, write us. We frequently have specimen stock of certain varieties and always have younger or smaller stock than we quote. Describe the class of stock desired and we will quote on such as we can supply.

In order to make it easier for planter to select trees for particular purposes we have adopted letters to denote the various classes, as follows:

T—Denotes trees that attain a height of 50 feet and over at maturity.

M—Denotes trees that attain a height of 25 to 40 feet at maturity.

S—Denotes trees that attain a height of 8 to 15 feet at maturity.

D—Denotes trees that attain a height of 2 to 8 feet at maturity.

NOMENCLATURE

The names of Trees, Shrubs, Perennials, etc., published in this Catalogue are in accordance with the recommendations adopted by the American Joint Committee on Horticultural Nomenclature, representing the American Association of Nurserymen, Ornamental Growers' Association, American Society of Landscape Architects, American Pharmaceutical Association, American Association of Park Superintendents.

Evergreens-Coniferae

Our trees have all been transplanted two or three times, are handsome, selected trees, well branched and rooted, suitable for lawns, etc.

Evergreens can be most successfully transplanted a short time before they are ready to start into growth in the spring. They can also be planted safely very early in the fall. The soil to receive them should be mellow and fine, and great care taken that it is well packed about the roots after they have been well spread out in a natural position.

Wherever possible we dig with ball of earth and wrap same in damp burlap; otherwise we pack roots in wet moss immediately after digging.

CAUTION.—Do not let the sun or wind strike the roots of Evergreens even for a few minutes; you will kill them if you do. Plant immediately on receipt; give thorough drenching of water, but do not apply over the foliage.

Specimen trees and sizes not quoted herein will be priced on application.

All Evergreens are balled and burlapped unless otherwise specified.

Roses

HYBRID PERPETUAL ROSES— Rosa Hybrida Cifera

This class of roses is admirably suited for garden culture, for the formation of rose beds, hedges and permanent plantations, where hardy varieties of roses are desired. They are of easy culture and luxuriant in a deep rich soil. They are benefited by mulching in the fall of the year. Prune according to the habit of growth, cutting back close all weak shoots and shortening the long canes to a convenient length.

The plants offered by us are strong field-grown, delivered in dormant condition. Fall or early spring delivery.

HYBRID TEA, TEA, CHINA AND BOURBON ROSES

This class of roses is suitable for general cultivation, as they are usually our very best roses, blooming continuously throughout the season. Require more care in winter protection than do the Hybrid Perpetuals in this climate and further north, but will repay the extra care in a goodly supply of fine flowers when roses of the hardy variety are scarce.

(Not ready for delivery before latter part of April and early May, according to weather conditions. Customers will do well to leave the time of shipment to us.)

NOTICE.—In case we are sold out on any one grade, we reserve the right to substitute variety of same color or send either the next larger or smaller grade, changing prices accordingly. If it is not desirable that we do this, please so state on your order.

Select Hardy Perennials

Weber's perennials are different than those offered by many houses. Our plants are grown in open field one year, potted in suitable size pots in the fall and carried over winter in cold frames. Perennials handled this way give best satisfaction. They can be planted as soon as ground is in fit condition in spring and bloom the same year.
